Herald by iomer

Newsletters for SharePoint Online

Herald builds newsletters from the content you already publish. Pull in news, events, documents and people, lay out the issue once, and publish it as a page, an email, a Teams post and a PDF, with every edition kept in a searchable archive.

4	1	All	0
channels for every issue	issue layout for every channel	editions kept in an archive	servers to host

Features

Sources

- News, events, documents and people
- Field maps for each source list

Herald by iomer

Newsletters for SharePoint Online

Specifications

RELEASE	Version 2.1.0
PACKAGE	Herald app. Its own SharePoint Framework package, deployed from the tenant app catalog.
PLATFORMS	Runs natively on SharePoint under SharePoint native, Keystone, Powell, Omnia or Involv.
DATA	Lists on your comms site: issues, sections, sources (field maps) and audit. No external database.
IDENTITY	Runs as the signed-in person over SharePoint. No extra Microsoft Graph permissions.
MESSAGING	Email and Teams delivery through Herald's flows or the shared suite flows.
SETUP	Guided setup that never deletes, a Lists and checks screen, and a health check with one-click repair. Sample data can be added, removed or reset.
SEARCH	Published content stays visible to Microsoft 365 search and Copilot; working lists are hidden and kept out of results.
OFFERING	An iomer accelerator with annual usage rights per tenant.

In the iomer Suite

- Builds sections from registered products: Chronicle, Marquee, Hazel, Beacon and Laurel.
- Its issues can sit in Trellis page sections.
- Reach and reading by department in one report with the full suite.

What you need

- SharePoint Online in Microsoft 365
- A SharePoint admin to deploy the package
- A comms or news site
- Power Automate for email and Teams delivery

Ask iomer for a walkthrough: contactus@iomer.com

HOW IOMER DELIVERS IT

1. **Plan** — Choose the site and layout with iomer.
2. **Install** — Deploy the package and run guided setup.
3. **Configure** — Apply permissions, roles and settings.
4. **Connect** — Register with Workbench as the suite grows.

Microsoft, Microsoft 365, SharePoint, Teams, Copilot, Entra, Planner, Power Automate and Azure are trademarks of the Microsoft group of companies.
